Didsbury Jerseys Win Many Prizes

The Didsbury Jersey Farms' exhibit at the Calgary Exhibition made an excellent showing in competition with herds from the east as well as other Alberta points. They made the best showing with their younger animals which were bred on the farms here.

"Didsbury Raleigh's Idalene" won 1st in the heifer calf class and was placed reserve champion junior Jersey female.

"Didsbury Raleigh's Peony" was second in the junior yearling heifer class.

"Didsbury Raleigh's Noble" won 2nd in the bull calf class.

The Farms also won the following awards: 3rd for bull 3 years and under; 4th and 5th for cows 4 years and under, in milk; 4th in senior yearling heifer; 2nd in progeny of dam, two animals, and 2nd in get of sire, three animals under 2 years.

Royal Canadian Shows To Visit Didsbury

The Royal Canadian Shows, a large amusement enterprise carrying 50 people will visit Didsbury bringing with them their entire merry midway show on Monday and Tuesday, August 8th and 9th. The shows carry four thrilling rides and feature a wild animal show with rare specimens never before exhibited in Canada.

This is the largest organized show ever to appear in Didsbury.—Remember the dates.

Didsbury Fair Big Success

"The Best Fair in Years" was the remark heard on every side when the Didsbury Agricultural Society held their 33rd annual fair on Wednesday afternoon.

There was a splendid exhibit of horses, 130 entries being shown of the best in the district. Cattle exhibits were well up to standard with about 100 entries.

Exhibits in the exhibition building were the best in years. The exhibition of flowers made a colorful showing but the largest increase in entries was made in the domestic science department, one side of the hall being taken up with exhibits of this division.

A full list of prizewinners will be published in future issues of the Pioneer.

The Midway attractions and the Booth were in charge of the sports committee and they report a splendid business.

Harness and running races provided a full afternoon program of sports and there were full entries in every race.

Hail Strikes East of Didsbury

Storms Sunday and Tuesday Evenings Do Considerable Damage

For the third year in succession hail devastated crops 15 miles east of Didsbury. Bumper crops were destroyed on a strip about 4 miles wide.

The storm started northwest of Innisfail and cut a swath which extended southeast to a point about 7 miles south of Carbon, according to information it was possible to gather late Sunday night.

It is estimated that some 225,000 acres of agricultural land lay in the path of the storms which were the culmination of one of the hottest days of the year. It was one of the worst hailstorms of the last few years.

The reported loss ranged from "slight" to "total," for the fury of the storm did not rage consistently over the entire area. The width of the storm also varied, with 5 miles being given as the widest part of the swath.

Strong winds and heavy rains accompanied the hail.

Districts where heavy hail damage occurred reported as follows:

Innisfail, northwest to southeast

Bowden, northwest to southeast, passing through town.

Olde, east of town.

Didsbury, 15 miles east of town.

Acme, some hail in town, but northwest and west. Two separate storms reported.

Carbon, hail 1 mile south and 5 east. No hail 7 miles south

A second hail storm struck the district east of town with disastrous results on Tuesday night. The damage is estimated from 10 to 100 per cent. On the west side of the track of the hail, H. W. Morgan reports slight damage while A. V. Buckler further south reports 50 per cent. C. N. Brado and Phil McNeil in the centre of the path reported 100 per cent and W. Archer on the east side reports 10 per cent.

Excessive damage is reported in the Olde district. Sixty or seventy per cent of the land in the Mountain View Municipality is reported to have received hail damage.

12 & Under: 1 Stewart Liesemer;

2 Jack Williamson, Carstairs;

3 Bill Moon.

In the evening a baseball tournament was played with the Didsbury, Melvin and Lone Pine clubs competing.

Melvin beat Didsbury by a score of 7-6 in the first round.

The second round was called on account of darkness, with 3 1/2 innings played, when Lone Pine had Melvin down with a score of 13-2.

Hikers March To Minnewanka

Red Goodfellow, Percy Lunt, Ward Wyman and Jim Trounes are spending their vacation hiking to Lake Minnewanka in the Banff National Park.

Eddie Ford took them as far as Hunter Valley on Sunday morning by car. They crossed the river over the bucket trolley and from there they will hike across the mountains, camping on the way.

They expect to make about 12 miles a day and will be picked up by car at Lake Minnewanka on Friday.

Eric Moffatt says that the last seen of the party was that "Red" had lost his glasses and was being led by the hand by Percy.

Fishermen Make Splendid Catch

The best catch of the season was reported on Sunday evening, when Charlie Mortimer and Ross Ford brought in 39 fine Lock Leven trout. The fish measured up to 23 inches and several weighed from 3 1/2 to 4 pounds.

The fish were caught at Charlie's favorite fishing grounds on the Raven.

Crystal Dairy Gets Prize Awards

The Didsbury Creamery were successful in getting into prize awards in the western fair circuit. At both Brandon and Calgary they were winners of second prizes in the butter exhibits.

The Didsbury Creamery have been consistent exhibitors at the fairs throughout Canada and invariably get into the prize money, which is complimentary not only to the buttermaker but also to the quality of cream produced by the local dairymen.

At The Movies

"Tarzan Escapes" Breath-Taking Jungle Adventure!

TARZAN, amazing character of the fiction of Edgar Rice Burroughs, comes once more to the screen, as Johnny Weissmuller and Maureen O'Sullivan are reunited in "Tarzan Escapes," Metro-Goldwyn-Mayer's latest jungle romance to be seen at the Opera House this Friday and Saturday.

The present story marks the closest approach of Tarzan to civilization. He is captured by a "bring-em-back-alive" animal collector who locks him in a cage and plans to take him to London to exhibit. In a thrilling and dramatic climax the son of the primeval wilds outwits his civilized enemy, saves himself, and also his animal friends.

U.F.A. and U.F.W.A. To Hold Conference

Didsbury U.F.A. and U.F.W.A. Constituency Association will hold its annual conference at Lone Pine Hall on Wednesday, July 27. There will be a picnic dinner and ladies are asked to bring lunch baskets.

The executive will meet at 11 a.m. and in the afternoon at 1:30 Robert Gardiner and George Church will address an open meeting.

Come 5,000 Miles For Three Day Stay Among Mountains

Banff, Lake Louise and Emerald Lake apparently have a great attraction for some people in England.

So much does it appeal to them that a party of eight people are travelling over 5,000 miles to spend three days in the mountain resorts before returning to the Old Country.

They arrived on the Empress of Australia at Quebec on Saturday, pass through Calgary on July 23, spend one day each in Banff, Lake Louise and Emerald Lake, and leave for home again on July 27th. D. P. Shipton, of the London C.P.R. office, is in charge of the party.

Mr. and Mrs. Ed Watkin left on Sunday on their trailer tour to Waterton Lake and U.S. points

A Livelier Education

While considerable strides have been made in recent years towards the goal of a more attractive educational program for the children in both public and high schools, experimentation shows that further steps can yet be taken before the people and educational authorities of this country can proclaim that the ultimate has been reached.

It is a sine qua non that the more attractive school curricula can be made, the greater the interest that can be secured and, ergo, the greater the interest, the more productive will be the results.

The older generation can well remember the days when history was largely comprised of a long list of dates, tabulated unrelated events and complicated genealogical trees; when a lesson in geography meant committal to memory the fact that certain cities and towns are located on such and such rivers and are noted for the manufacture of this or that commodity, while nature study, what little there was of it, consisted of poring over books to determine by sheer feat of memory the difference between a sepal and a petal and to differentiate between stamens and pistil, and who that is old enough to have lived in those days can forget the agonies that were undergone to try and remember, let alone understand, that the square on the hypotenuse of a right angled triangle is equal to the sum of the triangles on the other two sides, when taught from a book full of geometrical designs studded with theorems and hypotheses.

Some Steps Forward

As indicated at the outset the science of education has moved forward considerably since those dark days and something has been done to make these and other subjects more alive and interesting and, therefore, more readily comprehensible and more easily assimilated than in the days of the youth of the present older generation.

While that is true no one would have the hardihood to say that the end of the road has been reached and that something more might not be done to remove the rocks from the paths of learning.

The younger children largely live in a land of make-believe of their own devising and to some extent educational authorities have made use of this natural phenomenon to guide and develop their mentality through play acting.

As children develop they become more realistic and here again the wise psychologist takes advantage of the trend to pattern studies on the tableaux vivants order with an eye to practicality, and the pedagogue who adopts this viewpoint will get results where the teacher who merely follows the prescribed routine will find his or her students trailing far behind.

An Interesting Experiment

Giving point to this doctrine, an interesting experiment was carried out in the Regina, Saskatchewan, high schools during the last two weeks in June this summer when a special program for grades nine and ten students, who had been promoted and could not be required to attend classes the last two weeks of the term while their less fortunate colleagues were writing examinations, was put into effect.

This program comprised visits to industrial plants in the city, where processes of manufacture were demonstrated and explained to the students; a visit to the Parliament Buildings where the students conducted a mock parliament with considerable credit to themselves and their teachers; visits to the natural history museum and other institutions where much first hand, concrete information was readily grasped, supplemented by educational films and other attractive media for the assimilation of useful and practical knowledge.

Contrary to expectation the students did not think they had been cheated out of a well-earned extra holiday, but responded eagerly to this special program in the devising of which they had played a part, demonstrating the truth of the assertion that children are willing and anxious to learn, provided interest can be aroused and sustained.

Should Not Stop

What the ultimate result of the experiment will be, it is difficult to forecast, but in all probability it will lead to the adoption of more of such methods in the day to day curriculum the year round.

What is being done in the larger city schools to stimulate interest can be done in the little red schoolhouses dotted all over the prairies on a smaller scale with revisions to suit local circumstances and conditions. The opportunity is there and it only requires adaptation on the part of the alert teacher with vision, to make education more realistic, more practical and more attractive with attendant greater and more enduring results.

The Smallest Ocean

The Mediterranean is the smallest ocean on the globe yet more famous in history than all others combined. A million square miles of warm, blue and peaceful seas with only one contributory river, the Nile. Sea of the ages, heroes of the Bible, of Greece and of Rome all knew it.

Although neighboring countries appear to have been ignorant of the drink, Abyssinians used coffee as early as the 15th century.

Waterpower is sometimes called white coal.

Birds that have drifted to new territory, where climatic conditions are different, gradually change in type until a subspecies is formed.

Winnipeg is the greatest transportation centre in Canada, with the largest individually owned railroad yards in the world.

One of every two persons living in Copenhagen, the Danish capital, owns a bicycle.

A large collie dog has been observed running wild with a band of coyotes in Colorado.

Outlaw Rulers
The Enormous Power Given To Individual Men

The most significant and most disturbing fact in these troubled times is the enormous power of individual men. The future welfare depends upon the will of three men who are despots.

This situation is not a new thing in the world, for kings of old were autocrats whose lightest whim was law; but one must go far back in history to find such rulers who made themselves great.

The kings of modern times were ordinary men, guided by their Ministers. Moreover, they were restrained by certain codes of behavior and unwritten laws, for their first duty was to be gentlemen. And Christian gentlemen are not likely to be a menace to the world.

The new strong men are a different breed. They are not hampered by precedent or ethical standards or codes of morality. They never learned that certain things "simply aren't done" by gentlemen.

For they came up from the bottom, and they recognize no law but force and no rule but their own will. They are as ruthless, as cold-blooded and as conscience-free as any buccaneer who sailed the Spanish Main. Men of their kind—strong, daring, domineering—have slit throats and looted the earth since history began. They are the Genghis Khans, Tamerlanes, Alexanders, Napoleons. —Robert Quillen in "The Fountain Inn Tribune".

SO COMFORTABLE — DIVIDED SKIRTS

By Anne Adams

4647

Sample the ease of movement you get with a divided skirt, and you'll always have one in your wardrobe! As for the making—it's easy as A B C, with Anne Adams' pattern 4647 giving easy-to-follow directions. A few seams—that's all! And the pleats will fall into place like a charm—even if you are a beginner at dressmaking. Be sure to choose a heavy drill or linen, best of all, a wrinkle-resistant type. You'll feel as sleek as a seal, as correctly and smartly attired as a fashion plate, when you step out for golf, tennis, hiking, or a sail on the lake.

Pattern 4647 is available in waist sizes 25, 26, 28, 30 and 32 and 34. Size 26 takes 3½ yards 36 inch fabric. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Of 70,000,000 acres of land suitable for agricultural development in the province of Alberta, Canada, only 18,000,000 acres are actually cultivated.

Long, curving eyelashes are normal for children, but usually give place to straight lashes about the age of 16. 2262

MOST MILES PER DOLLAR

Over Niagara Falls

Jean Lussier May Make Another Attempt In A Rubber Ball

Jean Lussier, who rode a rubber ball to fame over Niagara Falls in 1928, is thinking of trying it all over again.

But if he does, he said, it will be with exciting variations.

For one thing, he will go over the rocky American fall instead of the gushing Canadian horseshoe. And his rubber ball this time will be bigger than before, increasing in size like a huge soap bubble as it begins the 165-foot drop.

Lussier, once a salesman in Springfield, Mass., was set adrift in a rubber ball in the Niagara river above the falls at 3:05 p.m., July 4, 1928. The ball was six feet in diameter.

At 3:34 p.m. a hushed crowd saw the ball sucked over the brink of the Canadian horseshoe, to reappear a few moments later in the rapids below. At 4:03 p.m. Lussier crawled out of the ball, showing only one small scratch as a souvenir of his experience.

Lussier says he has designed a ball eight feet in diameter. This would roll over the rocks toward the American fall, where the river is shallower. In falling, flaps on the side would spread out in a parachute effect.

Canada's First Oil Well

Plaque Unveiled Which Marks Site At Oil Springs, Ontario

The historic sites and monuments board of Canada, under the direction of Prof. Fred Landon, of the University of Western Ontario, unveiled July 1 at Oil Spring a memorial plaque to commemorate the first oil well in Canada.

In the earliest history of the locality of Oil Springs travellers observed the presence of oil, which they used for medicinal purposes. In 1858 James M. Williams dug the first well in Canada, later he established a refinery at Hamilton to manufacture illuminating oils. In 1861 John Shaw drilled deeper into the rock and struck the first flowing well, the location of which is on the south bank of Black Creek in Oil Springs. This well and the wells following were the biggest wells ever struck up to the present time in Canada.

Some of them had a flow of from 3,000 to 7,000 barrels per day. Finally these wells played out and the town became almost deserted. Then in 1885 and 1886 men drilled deeper again into the rock and discovered the wells which at the present time are still producing crude oil after 50 years.

Air Recruiting Campaign

Royal Air Force Has Asked For 31,650 Volunteers

Launching the greatest recruiting campaign ever undertaken by the Royal Air Force, Sir Kingsley Wood, secretary for air, has asked for 31,650 volunteers. Enrolment of the new flyers and technicians will begin at once.

Sir Kingsley called for 2,100 pilots, 550 observers, 26,000 specialized workers and 3,000 apprentices.

The pilot recruits, who will have officer status, will be paid £340 (\$1,700) the first year and £390 thereafter during a four-year enlistment. Upon entering the reserves for six years they will be paid bonuses running up to £300.

Candidates for these posts must be between the ages of 17 and 25 years and must have a good primary education.

SELECTED RECIPES

THREE-FRUIT ICE CREAM

- ½ cup sugar
- 2 oranges, sections free from membrane and diced
- 2 bananas, mashed
- ½ cup cut maraschino cherries
- 1 package Lemon Jell-O Ice Cream Powder
- ¼ teaspoon salt
- 1 quart milk

Add sugar to prepared fruit and let stand while ice cream mixture is being made. Combine Jell-O Ice Cream Powder and salt; add milk very gradually, stirring until dissolved. Freeze in freezer until thick but not hard; add fruit and continue freezing. Makes two quarts ice cream.

COFFEE ICE CREAM

- 1 package Unflavoured Jell-O Ice Cream Powder
 - 1 cup sugar
 - 1 cup water
 - 2 cups strong coffee
 - 1 cup evaporated milk
- Combine Jell-O Ice Cream Powder and sugar, add water and coffee very gradually, stirring until dissolved. Then add evaporated milk. Freeze in freezer. Makes about 1½ quarts coffee ice cream.

Dorothy—"Mother, what did you do when a boy first kissed you?"

Mother—"Never mind."

Dorothy—"That's funny. I did the same thing."

The mind is like a parachute; it functions only when it is open.

Pacific salmon are the most valuable fish in the western hemisphere.

Field Crop Production Area May Be Stabilized At Sixty Million Acres for Some Time

Total area devoted to field crop production in Canada will probably be stabilized at about 60 million acres for some time to come, Dr. L. E. Kirk, dean of the department of agriculture, University of Saskatchewan, Saskatoon, said in a paper prepared for delivery to the Canadian Chemical Association convention at Ottawa.

Analysis of the statistics of field crop acreage from 1870 to 1930 indicates the period of most rapid expansion is definitely past, said Dr. Kirk. In those years the rate of increase in field crop production averaged 4.7 per cent. annually. Since 1930 there had been a steady decline in the production of wheat, oats, barley and rye. Wheat and barley decreases were accounted for largely by drought.

"Increase in acreage will be limited by two factors; the probable retirement from production of much land in the arid areas and the reduced fertility of the wooded land now available for cultivation on the northern fringe of settlement," he said.

Canada would use 298,000 tons of fertilizer in 1938, but only 9,000 tons will be used on the prairie provinces. Future use of fertilizers will be to maintain fertility rather than to produce tremendously enlarged yields, he predicted.

The hazards of crop production in the west should be minimized. He said new rust-resistant wheat varieties were available and soon there would be seed enough for all the rust areas.

"Plant breeders are likely to develop varieties with resistance to other diseases and to the ravages of insect pests as well as drought hardness," he said.

Dr. G. S. Whitby, director of the division of chemistry, National Research Council, Ottawa, said there should be systematic and sustained research in the bituminous tar sands of Alberta. These deposits were so extensive they contained a quantity of bitumen variously estimated to be four to 10 times the present known oil reserves in the world.

"The production from them of various petroleum oils, although perhaps of only limited commercial importance at the moment, with crude oil prices at their present level, is likely to be so important in the future that systematic and sustained research should be devoted to the material," he said.

Ancient Hallmarks

Exhibition Of Silver Work To Be Shown In London

For the first time for six centuries the Worshipful Company of Goldsmiths are to organize a large-scale exhibition at the famous Goldsmiths' Hall, in the city of London. But the exhibition will deal with silver.

In the immense salons of the hall, hundreds of thousands of pounds' worth of silverwork, glistening beneath hundreds of candles in the massive chandeliers and illuminated from the walls by concealed lighting, will be on view. Among the exhibits will be the Calix Majestatis, or Cup of Majesty, which was designed to commemorate the Coronation, and is kept at Holyrood, now being seen in England for the first time. On the Goldsmiths' premises, though not open to the public, is the Assay Office, where to this day the company still set their hallmark on London's output of gold and silver wares after they have passed their test for fineness.

This process, now carried out under statutory authority, was termed "ancient" 600 years ago. In addition to marks denoting the standard, date and makers, all plate marked at the hall bears the imprint of the Leopard's Head, the oldest hallmark in origin, described in the Goldsmiths' first Royal Charter of 1327 as "a stamp of a punction with a leopard's head as of ancient times it was ordained".

Eleven of the chemical elements make up 99½ per cent. of the earth's crust.

Poisonous snakes are immune to the venom of one another.

Proud Of Her Record

Indian Woman Has Attended Church Every Week For 95 Years

There is some doubt about the actual age of Mrs. Elizabeth Turkey, resident on the Six Nations' Reserve, near Brantford, Ont., but there is no doubt that for 95 years she has not missed a Sunday church service, except on one or two occasions when illness kept her away. And even then she attended service during the week to make up for her absence.

This record is believed to be without parallel in the Dominion. Records of her actual birth are being sought at Hagersville. Her grandsons, Gordon Smith and Norman Hale, with whom she lives, say her age is 104.

A Mohawk Indian, Mrs. Turkey does not have the appearance of a woman well past the 100-mark. Her hearing and eyesight are keen, she gathers her own wood and gets around unassisted. Threading a needle, which calls for sharp eyesight and a steady hand, holds no terrors for her. When her photograph was taken recently, the rector and choir of Sour Springs Anglican Church turned out voluntarily to pose with her, so proud are they of her unique record.

Mrs. Turkey attributes her age to no one thing. A clean, healthy, active outdoor life is most responsible, she says. She has worked hard and still does her own work, sewing, cooking and washing. Her husband died in 1903 at an advanced age. Mrs. Turkey is the mother of ten children, only three of whom lived to adult age. One son, Sandy, drowned at the age of 50, while swimming in the Grand River.

Age Of Cynicism

Speaker Sees Challenge To The Orderly Way Of Life

Cynicism whereby there was doubt of the very foundation of justice was a real danger in the world to-day, Dr. J. S. Thomson, president of the University of Saskatchewan, told the Law Society of Saskatchewan at Saskatoon. That attitude was clearly evident in modern literature and in the realm of international affairs, cynicism could be seen taking the "name of realism."

"Your profession rests on the assumption that there is law in the universe, that there is such a thing as justice in the light of which law can be administered," Dr. Thomson said before the assembly of barristers. Challenges to orderly ways of life were coming from the popular attitude in two directions, the university president believed. First was a "half-baked psychology given the high falutin' name of self-expressionism." There was a defiance of suppression and repression and the moral attitudes that ought to be in every good man.

Second was the new conception of the range of legislation which had grown up through modern social demands. Although providing benefits, the romantic faith that human welfare could be promoted by legislation was doomed to considerable disappointment, Dr. Thomson contended.

If evil cynicism did its ugly worst, the speaker confessed he had very little hope for the world. He urged fundamental thinking on the whole meaning of life and its relation to a great metaphysical background.

President Was Clever

Found Way To Adjourn Meeting When Members Were Obstinate

The meeting had dragged on interminably. The president was anxious to leave, but there were still a few obstinate members who insisted on continuing until the matter in question was settled, although it was apparent that no progress was being made. At last he could stand it no longer. "All those in favor of adjournment," he announced, "may signify by getting up and leaving—opposed, the same!" And he walked out.

In medieval China no less than 35 varieties of chrysanthemums were grown.

Menace To Game Birds

Jack Miner Urges Control Of Feathered Killers (By Lance Connery)

Truly a friend of bird life, Jack Miner is nevertheless no advocate of protection for feathered killers like hawks and owls. Control of these offenders, not extermination, is urged by the Kingsville naturalist.

Why some advocate protection of such birds for killing chickens, when human beings themselves must suffer fines or imprisonment for the same offense, the naturalist cannot understand. His attitude is that of the staunch conservationist he is—the most good for the greatest number.

Or put it this way, he says: "Some have advanced the idea that killing other bird life is the natural way for hawks and owls to get their living. If this argument holds good, then why kill the common field mouse if it eats the bark of your young apple trees, when it is the creature's natural way of life? Why kill the potato bug for eating your potato vines? Why kill the sheep dog if it kills your sheep? This argument is sheer nonsense."

Another argument used by advocates of hawk protection is that certain species of small hawks destroy a goodly number of crickets and grasshoppers. But, says the keeper of the Kingsville sanctuary, they forget that any one of these thousands of valuable song and insectivorous birds would eat an equal number of the pests, if allowed to live.

Furthermore, the naturalist has found in his lengthy experience in raising pheasants and quail, that when these birds are very young their greatest enemies are these same small hawks. If they are such a menace to small birds in captivity, surely they would still further imperil the existence of game birds in the wild state, which authorities are now trying to re-stock.

Another argument advanced on behalf of protective measures for hawks is that hawks perform a useful function in removing diseased and sickly birds. But Jack Miner says that during the 19th century fully 90 per cent. of North America bird life was composed of passenger pigeons. These birds were wiped out by disease, yet no corresponding reduction in the ranks of the predatory hawks followed.

But the naturalist's final word is to point out the absurdity of provincial authorities to raise game birds in captivity at a heavy cost, only to release them and protect the hawks which soon make heavy inroads on their numbers.

Not Exactly Suffering

With the rank and file of musicians starving, here's the emolument James Petrillo, prexy of the Chicago musicians' union, received last year: A \$28,000 salary, a \$25,000 home, \$12,000 for home furnishings, \$1,700 for a garden, \$16,000 extra to cover his income taxes, \$25,000 for an armored car with guards, \$5,000 for expenses and a few other trivial items adding up to \$110,700.

Bering strait, as well as Bering sea, is named for Vitus Bering, who discovered it in July 1728.

Distance Canada Has Come In Development During A Very Short History

Comfortable Log Houses

Are Warm In Winter And Cool In Summer

Original log houses are getting scarce, even in East Kildonan, near Winnipeg. As you motor north into East St. Paul there's an old weathered example of this kind of pioneer house nearly 100 years old.

"It's the most comfortable old home I've lived in during my 25 years in Canada," said Mrs. W. Dean, the occupant.

It was built by Archibald Pritchard, son of John Pritchard, one of the Selkirk settlers for his private secretary. John kept a boys' school known as The Elms in East Kildonan, well known in the early days of the settlement.

Archibald was married in 1856 in St. Paul's Church, Middlechurch, across the Red River. His bride was Emily Mary Else, who was brought to Canada by her mother when she was 11 years old. They came on a sailing boat via York Factory and had to spend a winter on Hudson Bay before proceeding to Red River. Emily had come out to be a teacher for the Hudson's Bay Co.

Mrs. Dean showed the interviewer a brown wooden ball and six wooden rungs: the rungs she then screwed into holes in the ball, making an object that stood like a tripod with three more legs in the air. "It used to stand on a woman's bureau, it's a cap stand," she said triumphantly. "And this little sugar bowl is more than 100 years old. It was used when sugar was so dear no more than this would hold could be afforded." It was doll-size.

The house was cool in summer and warm in winter, affirmed Mrs. Dean. The floors and stairs had listed a bit, to be sure, but they were still firm. The stair railing was hand-cut with banisters made from wood cut an inch square and set into the handrail diagonally. Eleven little Pritchards went up them in their day, boys in tight little suits, girls in full gathered dresses and aprons.

Solid Anyway

The bishop was very tired. There were many candidates for confirmation, and the church grew hotter and hotter. The bishop could feel his eyes getting heavy.

At last, when he was nearing the end of his labors, a bald-headed man knelt in front of him.

The bishop, suppressing a yawn, put both his hands on the shining head, and muttered, "I declare this stone to be well and truly laid."

Nature provided the firefly with a flashlight, but he never seems to find what he is looking for. Think what a mosquito could do with that extra equipment.

"I'm a self-made man."
"You're lucky. I'm the revised work of a wife and three daughters."

Not long ago Hon. Vincent Massey, Canada's High Commissioner in England, made an attempt to counter-balance some of the more gloomy accounts of this country's difficulties. He pointed out that many startling stories about the Prairie West in particular had thrown an unfair shadow over the true picture.

Then the other day Lord Tweedsmuir told visiting Scottish farmers that "Canada gets rotten publicity; too much for the failures and too little for the successes."

That is true enough. Not only the outside world, but even certain parts of the Dominion, get distorted views of conditions. There is a great deal said about drought, the railways and taxation; there is little enough about our position as the fifth trading nation of the world; our steady increase in a huge mineral production and the remarkable progress of manufacturing in a country with a relatively small, scattered population.

All this has taken place in the space of about half a century, in the face of handicaps which are too little appreciated. As The Ottawa Journal remarks, "perhaps it isn't news, but it is a fact of first importance that alongside an English-speaking nation of 130 millions we have preserved and developed a British country, solidly devoted to the British tradition."

Truly enough it isn't "news". But whatever our extravagances and temporary dissensions have been through the course of a comparatively short history, the overcoming of great obstacles should be taken in proper perspective.

It is possible that the wide advertising of Canada as a get-rich-quick bonanza brought a reaction abroad when the country was hit by the depression; when the West, in particular, was suffering from unprecedented hardship.

It is possible, too, that the so-called "inferiority complex" of Canada in relation to the United States has made many people over-sensitive to the fact that outsiders are often quite ignorant about the country and its more prominent features.

But, as Lord Tweedsmuir indicated that is far from the whole story. If we have a new set of problems, and must approach them in a different spirit to that quite naturally adopted by the over-enthusiastic builders of an earlier day, there can be heart taken from the distance we have already come. It would be fatal to decide that those who pressed their schemes not wisely, but too well, had left a heritage which was bound to be aggravated.

There is certainly no advantage in broadcasting an unwarranted sensationalism about the more serious problems of the country, and taking completely for granted, not only within the Dominion, but in relation to outsiders, the achievements that are evident. It is poor advertising at best.—Hamilton Spectator.

Studying Soil Erosion

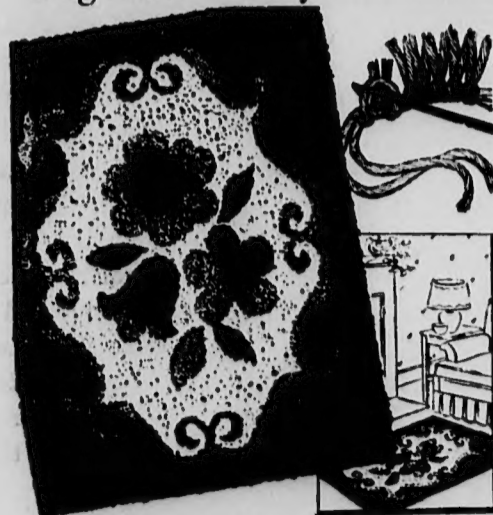

Problem Which Is World-Wide Is Being Investigated

Great Britain is making an investigation of soil erosion in all parts of the world, states the St. Thomas Times-Journal, and will issue a bulletin being prepared by the Imperial Bureaus of Soil Science and of Herbage Plants. In it will be disclosed how much damage is being caused the world's food supplies by soil erosion, and different attempts to fight the menace will be discussed. Reports so far received in London show that the problem affects Africa, China, India, Australia, Russia, all round the Mediterranean, the Dutch East Indies and the British West Indies as well as the midwestern states of America and the prairie provinces of Canada. In Africa it has been caused by over-grazing, in Australia by over-grazing and rabbits, and in China and Italy by deforestation.

Stocking sizes are given in terms of inches—a size 10 stocking being 10 inches long.

If a bride wishes people to think she has been married a long time, let her carry the suitcase.

Rug Made of Easy Crocheted Strip

Household Arts by Alice Brooks

An Original Alice Brooks Design

PATTERN 6166

Here's a new wrinkle in the art of rug-making. A rug made in a continuous length—just short ends caught through with a crochet hook—the strips then sewn together. The result a rich design—a luxurious pile. Use candlewick, rags or yarn. Pattern 6166 contains instructions and charts for making rug; illustrations of it and of stitches; materials needed; color chart.

To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

The World of Wheat

By H. G. L. STRANGE

Director "Crop Testing Plan"

"I sure will know this fall which of the new varieties of wheat is the best for my farm," said a good friend to me a few days ago. "How will you know that," I asked him. "Well," said he, "I've seeded two acres of Thatcher, Renown, Apex, Reward and Red Bobs, and I'll compare the yields of each with my main crop of Marquis. Then next year I'll sow the seed on a larger acreage from whichever two acres proves to be the best."

"That's a fine experiment," I answered him, "but don't for goodness sake use next year any of the seed from those two acre plots, for you'll find it very difficult, if not impossible, to harvest, thresh and to bin all those different varieties and not to get them badly mixed."

"From my own experience in seed growing, and from observing the work of hundreds of our best seed growers," I said, "I advise you to haul to the elevator the grain from all those two acre plots, and then next winter to purchase some good Registered or Certified seed of that variety you finally choose. Sow this good seed on clean land, then you will have a real good start with the variety you like."

"Mixtures of varieties," I told my friend, "are one of the commonest causes of low grades, hence of serious money losses to farmers."

Following factors have tended to raise price: Heat damages spring crop in Russia and Bulgaria -- North American Rust reports increase -- Argentine still making below normal progress -- United Kingdom buys large quantity of Roumanian wheat -- Active European demand for U.S. corn -- Flax stocks afloat for Europe are small.

Following factors have tended to lower price: Russia and Roumania offering wheat more freely -- Roumania announces export bounty -- Indian autumn food grain crops have good start -- French wheat estimates increased -- Wheat crop in Turkey expected to exceed 1937 crop -- U.S. government estimates wheat crop July 1st at 967 million -- Prairie moisture conditions improve.

Searle Precipitation Report No. 7

The rainfall situation in Western Canada has improved, on the average, by almost ten per cent in the last week, a most unusual betterment to occur in one week.

Taking into account the precipitation that occurred last autumn during the months of August, September and October, and the rains that have fallen this year from April 1st to July 9th, inclusive, and weighting for wheat acreage, the records reveal that the moisture situation for the prairie provinces as a unit, on July 9th, was 94 per cent of normal as compared with 86 per cent for three weeks ago and 65 per cent on July 9th a year ago.

The moisture condition for Alberta was 95 per cent of normal, on July 9th, as compared with 90 per cent last week and 90 per cent for the

Arrange For Opening Of Rugby Hall

The work on the new Rugby Community Hall is about completed and arrangements are being made for a grand opening on Friday, August 12.

A big day is contemplated, with baseball and softball in the afternoon, a big chicken supper, to be followed by a grand dance.

Mr. Archie Boyce will be the speaker at the official opening.

Editor,

Didsbury Pioneer:

One day last week as I was strolling down Main Street my attention was drawn to a small group of citizens gathered about a man (a hard-shell Conservative he was) who was in the act of giving the lunch the low-down on something or other.

Be it known I've no particular quarrel with Conservatives in general; they are alright in their place (in the legislature). But when it comes to peddling out street-corner politics they can't seem to step it with a real honest-to-goodness C.C.F. or a 1935 model Social Creditor.

This one, however, appeared to be doing fairly well—so well in fact that I at once suspected he had recently taken on a number of cold ones which, together with the heat, were just now beginning to take effect.

"I tell you, boys," he was saying as I came abreast, "them blanks of dashes up there at Edmonton are nothing but a bunch of hick yes-men. And that head boss of theirs, Old Applecart—haw, haw—the High and Mighty Premier Bill Applecart—he's the limit, yes sir, he is the limit! Never tells the truth and thinks nobody but himself knows a d—d thing about anything."

That got me. "Sir," said I, striving to control my voice, "your statements are false, absolutely false. Mr. Applecart happens to be a more or less special friend of mine and I do not intend to stand here and listen to him being thusly insulted. And I'll say without hesitation that he does sometimes speak the truth and that he does sometimes credit others with having inherited their rightful share of grey matter. Yes indeed, quite frequently. Why, just the Sunday before (BEFORE) the Saskatchewan election I heard him proclaim from his pulpit that the people of our neighboring province were a sensible, deep-thinking class of citizens. So what?" I added triumphantly.

"Hmph," growled this would-be Manion, "not bad. Well, seeing that you know so much, what can you tell us about this highway deal?"

But before I could frame up a suitable reply he had started off down the sidewalk, turned the corner by the Royal Bank and went a little west.

A mere incident, and yet it set me pondering. Among other things: how comes it that we haven't heard of our premier stepping the Irish Jig or the Highland Fling since June 8th. Perhaps he's spending his spare time trying to get Hitler's "Goose Step" or maybe it's Mussolini's "Turkey Trot" or—now I have it! I'll bet a million dollars (scrip) he's saving up his energy for that Home Sweet Home Waltz at the Farewell Ball which is going to be pulled off in the capital city before long.

Funny world, ain't it? Sure is.

Alberta Crop Report.

Issued by the Alberta Department of Agriculture

EDMONTON, July 12th.—Crops generally have shown improvement although reports from Grand Prairie, the North East and South East portions of the province indicate that general rains are needed. Further information in the crop report issued by the Department of Agriculture for July 12th, under the direction of Hon. D. B. Mullen, Minister of Agriculture, suggests that a large portion of the drought area has excellent stands of wheat and that the coarse grains are making rapid growth with early sown fields of oats in the shot-blade.

The weather has been generally favourable for rapid growth following a general rain over the province. Many crop districts also report heavy showers which covered wide areas. These rains were very beneficial since heavily stooled crops require an abundance of moisture.

The northern portion of the province reports many fields as patchy. This may be due to poor moisture conditions during germination or damage from insects.

Grasshoppers are flying in some districts while other areas report eggs are just hatching. Fieldmen in charge of the 'hopper campaign report excellent control with poisoned bait.

Cutworms are now reported in the pupa or chrysalis stage of development. Much less damage can now be expected.

Farmers are now cutting first crops of alfalfa and tame hay. The heavy rains have spoiled some early cuttings. The crop districts where irrigation is practiced reports exceptional stands of forage crops. Native grasses are being harvested with good yields. A large acreage of forage has been seeded since the general rain.

Most crop districts report pastures maintaining good growth, particularly in the areas where the heaviest rains have fallen. One crop reporter in the drought area advises moisture in virgin sod to have penetrated four to eight inches, and in cultivated land where crops are growing, to have reached a depth of two to five feet.

Ranch men report cattle making rapid gains on the excellent pastures and that the calf crop is higher than average. Sheepmen suggest that the wool crop is heavier than normal and that early spring lambs will soon be marketed.

Fowl and spring chickens are feeding a ready market with fryers demanding a good price depending on quality and local markets. Eggs are higher in price and the market is reported steady.

Many crop reporters indicate that dairy production is on the increase. Two or more factors may be influencing this production, namely a higher price level for better grades of cream and improved pastures.

Canadian Legion Notes

On Sunday next, July 24th, in the Legion Hall at 1:30 p.m. Major Leyton of Calgary will be on hand to make blood tests. Members and Scouts are requested to be present

The regular Legion meeting will be held Saturday, July 30th at 8:30 p.m. prompt. "On Town." At 9 p.m. Rev. A. S. Caughell will give an illustrated lecture on "Palestine." Boy Scouts, Wolf Cubs and all interested are cordially invited to the lecture.

The annual picnic arranged for July 27th has been postponed until further notice.

Scout and Cub Corner.**Alberta Scouts Try Open-Front Camp Shelters**

Something new in Canadian Boy Scout camping is being introduced this summer at Camp Woods, Alberta's provincial camp site on Sylvan Lake. This is the open front log camp shelter for many years used in winter as well as summer in the Adirondack mountains of New York State and known as the "Adirondack Shelter." Six such long huts, each 9 by 20 ft., were built by a party of Alberta Scouts and Rover Scouts, aided by two experienced Finnish log house builders. The shelters will be used instead of tents by Scoutmasters attending the Northern Alberta Gilwell training course, and later by the Scouts and Rovers.

Scouts Don Mortimer, Eldon Foote and Ralph Edwards left on Monday morning for a week at Camp Woods, Sylvan Lake.

A Modern Knight Throws Down The Gauntlet

When his foreman at the Woolwich arsenal made an insulting reference to scouting and Lord Baden-Powell, Rover Scout Tom Bromley, of the 12th West Ham Rover Crew, challenged him to a fight to the finish at the Green Gate Boxing Ring. The challenge was accepted, and the fight held. The Rover proved the better fighter, flooring his opponent three times, but the foreman was the better boxer, and the fight was declared a draw. At the conclusion the foreman apologised for his remarks, and later applied to become a member of the Rover Crew.

How Does Life Insurance Benefit The Farmer's Wife and Children?

Answer.—If the farmer has Life Insurance, the wife and children know that they will not be in want in case of his death.

Question.—How would insurance help?

Answer.—It would provide money for living expenses, to pay debts, meet mortgage payments, hire help, avoid sale of the farm at a sacrifice.

Q.—Couldn't this be done through ordinary savings?

A.—Usually a farmer leaves only a small amount of cash. Nor can he be sure to live long enough to save an adequate sum. Only through Life Insurance can he, with a minimum of saving each year, have the necessary money available in case of death.

Q.—How do the children benefit?

A.—The father who has Life Insurance is sure that the children will have the home, care and education that he intended.

Q.—How does Life Insurance benefit the farmer himself?

—If he lives to a retiring age, his insurance will provide a cash income to care for him.

WORLD HAPPENINGS BRIEFLY TOLD

D. H. Marshall of Saskatoon was elected president of the Business Educators' Association of Canada at the annual meeting at Hamilton.

Death of E. V. Lucas, 70, one of the most prolific writers of his generation, was announced recently in London.

Two young masked men held up a Canadian National Railways office in the Toronto Union station and escaped with \$400 after forcing two employees to open the office safe.

Bertrand H. Snell, Republican leader of the house of representatives and hard-hitting critic of the Roosevelt administration, announced his retirement from the United States congress.

Arthur Henderson, Labor, announced his intention of asking Prime Minister Chamberlain that closer consultations be instituted between the British and Dominion governments on foreign affairs.

President Roosevelt's decision against construction by the United States at this time of battleships larger than 35,000 tons suggests confirmation still is lacking that Japan is building super-warcraft.

Rabbi Samuel Sachs of the University Avenue Synagogue in downtown Toronto told police that the synagogue was broken into and damage caused to holy scrolls, bibles and prayer books. Nothing was stolen.

Six guns, some blankets, a hundred "Jews harps", paint and a conglomerate of other articles bought the present state of Delaware from the Indians for English settlers in 1675, a paper discovered by the Enoch Pratt library showed.

For Quick Results

Holland Gardeners Germinate All Their Seeds Before Planting

Interesting customs of the enterprising Dutch gardeners might be followed by gardeners elsewhere who wish to speed germination of seeds.

According to a plant breeder who came to this country from the Netherlands, the Hollanders place seeds in a cloth bag and hang the bag in a nearby canal overnight. The bag is taken out and hung for 48 hours in the cow barn, where it is warm. By this time the seed has sprouted and it is broadcast by hand in the garden plot.

Gardeners need not, of course, hunt up a canal or build a cow barn, but they may hang the seeds overnight in any water-filled container, then place the bag in a warmer place for two days and nights. This practice is especially recommended for beets, carrots and spinach seed.

Veteran Mountie Dead

Alan Forrester Joined Force Shortly After Riel Rebellion

Alan Forrester, who crossed the prairies ahead of steel as a member of the Royal Northwest Mounted Police, died at Nelson, B.C., aged 72.

A Great War veteran and one of the earliest members of the British Columbia police, he joined the Mounties in Regina shortly after the Riel rebellion, for which he enlisted but saw no active service. During his 10 years in the force he rose to be its youngest sergeant.

Forrester joined the customs service and British Columbia police at Rossland, B.C., in 1895, and went to Nelson 10 years later.

He was a native of Glasgow, Scotland, and went to Bruce county, Ontario, with his parents in 1872. He was educated at Royal Military College, Kingston, Ont.

The Dead Sea of Palestine contains no living creature, since it is too salty for life. Its chemical contents have been estimated to be worth more than \$1,200,000,000,000.

The most advantageous way to drink milk is to sip it. When gulped, it's likely to curdle, making it more difficult for the digestive juices to tackle.

Government scientists in Egypt have been doing research for two years for the purpose of raising standards of beeswax.

Belgium has tightened its censorship of motion pictures.

The Red Cross And Resuscitation

Specialized Knowledge Regarding Proper Methods To Be Followed

An integral part of Red Cross Home Nursing Course, the Schaefer Method of Resuscitation from drowning, gas poisoning and electric shock, has been demonstrated by the Red Cross to approximately 50,000 Canadian women and to thousands of High School students.

The Red Cross Home Nursing Course was initiated in 1924 to meet an insistent demand from women in all walks of life for specialized knowledge regarding the fundamentals of nursing science and the proper procedures to be followed in meeting emergencies.

Drowning being one of the major emergencies which might face any family, the Red Cross designed its Home Nursing Course so as to stress the importance of resuscitation and to familiarize every student with the Schaefer Method. This method is first demonstrated by a doctor or graduate nurse and, under their guidance, the students are then given actual practice in the method of procedure.

In addition, the Red Cross Home Nursing Manual, which is now in the emergency libraries of thousands of students, contains pictures and explicit instructions to be followed in case of drowning.

Many letters have been received from past students of the Red Cross, expressing gratitude for this knowledge and, in a number of cases, describing how they had already used it in the saving of life.

A Chaotic World

Lord Tweedsmuir Sees Civilization In Grave Peril

Lord Tweedsmuir, governor-general of Canada, declaring that men to-day lived in a "distressed and chaotic world," with civilization in "grave peril," commended to a Harvard University audience an attitude of "conservative, Christian anarchism."

Recipient of an honorary degree at Harvard's 27th commencement, he addressed the annual meeting of the Harvard Annual Association.

"Conservative," he added, "means that we want to preserve what is still vital in our heritage from the past. Anarchist means that we are resolute to clear away rubbish, whether new or old."

"We need a deepened respect for human nature. It is our business to fight whatever, for the sake of a narrow theory, would cramp and enslave human nature."

Humor was "the best weapon with which to fight pedantry and vain glory and false rhetoric."

In a time like the present, "when the ties of religion have been sadly relaxed, there is a tendency for popular leaders to exalt themselves into a kind of bogus deity and to think their shallow creeds a divine revelation."

"The answer to all that sort of folly is laughter."

The two main agricultural products in Babylonia were barley and dates, but farmers also raised onions, garlic, peas, beets and greens.

A sheep or deer stamps its forefeet when confronted by a dog, as did its ancestors in early times when beset by wolves.

NEW FROCK AND BOLERO TWOSOME

By Anne Adams

The very spirit of summer—in this new little frock with its own bolero! Mothers can make it up swiftly in a few short mornings—and they won't stop at one outfit either, because Pattern 4839 is just as appropriate for a Back-to-School outfit as it is for summer wear. The bolero may match or contrast, and top other outfits too—and how the children will adore it, since it's cut just like a grown-up's style. The sprightly dress will make the kiddies forget the heat. Look how the cap sleeves are cut in one with the bodice to simplify stitching—how few are the seams in that love of a high-waisted skirt—how little trimming is needed. Step-by-step sewing instructions included.

Pattern 4839 is available in children's size 2, 4, 6, 8 and 10. Sizes 6, dress and pantie, takes 2 yards 36 inch fabric, and 1 1/2 yards ruffling; bolero, 1/2 yards 36 inch fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

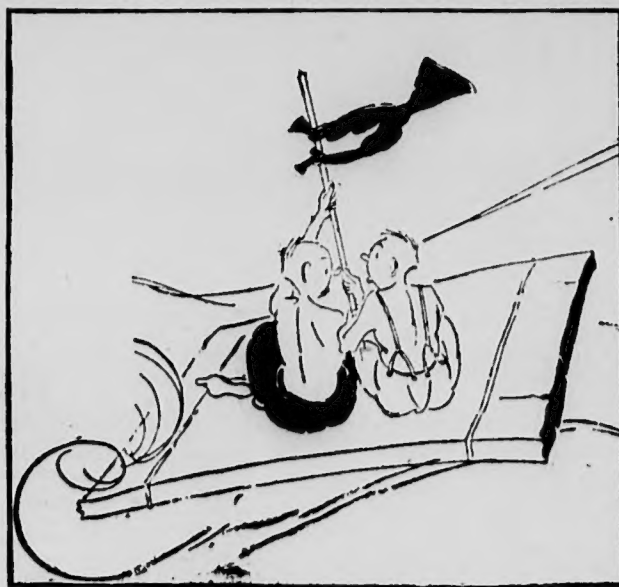

For Interest In Arts

Albert Medal For 1938 Has Been Given To Queen Mary

The council of the Royal Society of Arts has awarded the Albert Medal for 1938 to Queen Mary "in recognition of Her Majesty's unremitting interest in arts and manufactures to the great benefit of industry and commerce."

Examples of Queen Mary's interest in art are the prominent part which she played in connection with the British Industries Fair and the careful attention she gives year by year to the individual exhibits at the fair.

The Albert Medal has also been awarded to Queen Victoria, King Edward VII., King George V., the Duke of Windsor and the Duke of Connaught.

SHIPWRECKED SAILOR:

"Me mother always said I was born to be 'ung. I 'opes as how she's right."—Sydney Bulletin, Australia.

Memorial For King George V.

Status To Be Erected In The Shadow Of Westminster Abbey

Original plans for a large-scale empire memorial to King George V., involving demolition of several historic buildings, have been modified in favor of a more "compact and harmonious" scheme.

By decision of the executive committee of the memorial fund, a statue of the late sovereign will be erected on a rectangular grass plot in the shadows of Westminster Abbey and opposite the houses of parliament. The revised plan entails demolition of only one of the four 18th century Georgian houses condemned under the more ambitious project.

Since the memorial committee gave its approval to the larger scheme last fall, there have been rumblings of discontent, mainly from the society for the protection of ancient buildings and the royal fine art commission.

In criticizing the original memorial plan, recommended by a sub-committee and the architectural adviser, Sir Giles Gilbert Scott, the fine art commission submitted an alternative layout, curtailing the open space and preserving the notable buildings. Without greater compactness, it was contended, full justice could not be rendered to the royal memorial.

The suggestion was adopted.

Lack Of Restraint

Young People Of To-day Unwilling To Submit To Older Conventions

D. G. McCullagh of the department of social science at Toronto University, declared at Vancouver that young people of to-day are unwilling to submit to the older conventions.

Speaking before the sixth Canadian conference on social work, Mr. McCullagh quoted the words of Peter the Hermit in the eleventh century:

"Young people of to-day think of nothing but themselves. They have no reverence for their parents or old age. They are impatient of all restraint. What passes for wisdom with us is foolishness with them."

This, the speaker said, showed that adult attitude toward youth had changed little over the centuries.

"Many sociologists tend to believe the family is an outmoded institution, of which fact the increasing restlessness and revolt against conventional marriage are only symptoms," he said.

"They hold that mankind has passed through two stages, the clan and the family, and is now entering the third—the individual."

The most obvious evidence of family disorganization, Mr. McCullagh said, was found in the increase of divorces.

A Little-Known Trade

For Some Years England Has Been Importing Live Tortoises

A thriving but little-known trade is based at the London Dock where cargoes of live tortoises have been arriving for some years from Casa Blanca, Morocco.

As many as six hundred crates arrive in a consignment, each case containing 60 to 80 tortoises. The tortoises used to be shipped in barrels, but the mortality was so high that crates came into use and only a limited number is put into each crate. The tortoises are shipped in a comatose condition, but they appear to be quite awake when they reach the London Docks.

The majority are consigned to livestock dealers, chain stores, etc.—Port of London Monthly.

Fashion Note For Men

Violet is the "masculine color of vigor and strength" and men should wear more of it, Karl S. Bolander, director of the Columbus, O., Art Centre, asserted. Clad in a purple shirt, violet tie and brown suit, Bolander addressed a Buffalo advertising club and said: "Violet is my favorite color and it should be the favorite of every man. Violet gives a man confidence and power."

"But for Edison we wouldn't have had the motion picture, the talking machine, or the telephone."

"Yes; but I still think he was a great man."

British inventors have patented a silver plating that does not have to be polished.

Inevitably Allies

United States Will Be Found In Defence Of Principles Of Democracy

The average American may not define in words the loyalties he shares with certain other people. But in the democracies of Europe—in the little democracies in the danger zones; in the more fortunate democracies of Scandinavia; above all, in the great democracies of France and Britain—the average American finds a way of life which he knows instinctively to be the way of life which he himself has chosen.

He knows that these democracies are the outposts of our own kind of civilization, of the democratic system, of the progress we have achieved through the methods of self-government and of the progress we still hope to make tomorrow. He knows that if these outposts are overrun by dictatorships of either Right or Left we shall find ourselves deprived of friends. He knows that, despite geographical remoteness and a traditional desire to avoid entanglement in other peoples' quarrels, we are inevitably the natural allies of the democracies of Europe.

It is important that the statesmen of aggressor countries should realize that to-day, no less than in 1917, there are specific and vital American interests in all parts of the world which would almost certainly be affected by war on a large scale. It is important that they should realize the real depth of American loyalty to the whole set of principles and methods and traditions which goes by the name of democracy.

No remoteness from the scene of a potential European conflict can isolate the United States from the consequences of a major war. No Neutrality Act can prevent the American people from favoring their natural allies. In any ultimate test of strength between democracy and dictatorship, the good-will and the moral support—and in the long run more likely than not the physical power of the United States—will be found on the side of those nations defending a way of life which is our own way of life and the only way of life which Americans believe to be worth living.—New York Times.

Made Dream Come True

Lame Man Has Lawn Mower Operated By Remote Control

A lawn mower that operates by remote control while the operator rests in the shade of a tree is the dream that Alvin Lodge, of Millersville, Pennsylvania, has made come true.

The remote control was a necessity with Lodge. Too lame to do his grass cutting in the ordinary way, Lodge installed two motors on the usual type lawn mower from which the handle had been removed. Three wires run from the machine to a chair in the shade, thus enabling the operator to apply power to either wheel and make the turns.

A paint can fastened to the mower acts as a spool around which the wire winds and unwinds to prevent tangling. Ordinary house current operates the motors.

There are about 2,500 species of snakes in the world, and 300 of them are poisonous.

Luther Burbank developed white blackberries.

Dentists recommend Wrigley's Gum as an aid to strong, healthy teeth, cleanses them of food particles, massages the gums. Aids digestion, relieves stuffy feeling after meals. **Helps keep you healthy!** Take some home for the children too—they will love it! CS-11

WHAT HO!

— By —
RICHARD CONNELL
By Arrangement With Thomas Allen, Publisher, Toronto.

CHAPTER XIV.—Continued

"Good-by, Ernest," he said, "and may the gods who watch over the good bless you now and always."
"Good-by, sir," said Ernest, huskily. "And thank you for everything."
Rosa gave him her hand. He squeezed it so hard she gave a little cry of pain. Then, without another word, he turned and ran out of the castle, and jumped into the waiting car.

Ernest did not open the earl's farewell gift till he was in the train and on his way to London.

The package contained the earl's treasured collection of autographed photographs of motion picture actors and actresses.

Ernest began to laugh. Then, suddenly, he began to cry.

CHAPTER XV.

There were no sounds of revelry by day in Bingley Castle as the wonky car, containing Ernest, clattered away making sounds like a fat tap-dancer on a tin roof.

"Rosa!"
"Yes, father?"
"You're blubbering again."
"Yes, father."
"Don't."
"Can't help it."

"Hall's no place for it," said the earl. "Too draughty. Let's both go to my study and have a good cry."
"I'll stop," said Rosa. "What's the use? I think I'll go riding with Esme after all."

"And I," said the earl, "shall go and do things to the zinnias."
He started out of the door, then stopped, turned and shouted,
"Rosa!"

"Father? What's wrong?"
"I did meet that girl," said the earl.

"What girl?"
"Ernest's girl."
"You couldn't have."
"I did though."

"Ernest said she has never been in England."

"Master Ernest is a blooming liar." The earl caught his daughter's hand, and said,

"Come with papa. I'll show you." They half-ran to the library. From a case the earl took an old album, rifled through its pages, and stopped at one.

"Who is that, pray?" he exclaimed, triumphantly.

Rosa bent over his shoulder and looked at the old picture and the inscription.

"Lucy Bingley," she said.

"Knew that girl of Ernest's had a Bingley nose," said the earl.

"But she's been dead a century and more," said Rosa. "He can't be engaged to her."

"It would be unconventional," said the earl.

"Why should Ernest lie to me like that?"

"Ask him."

"He must be hiding something."

ITCH

... STOPPED IN A MINUTE ...
Are you tormented with the itching tortures of eczema, rashes, athlete's foot, eruptions, or other skin afflictions? For quick and happy relief, use cooling, antiseptic, liquid **D. D. D.**
Prescription: Its gentle oils soothe the irritated skin. Clear, greaseless and stainless—dries fast. Stops the most intense itching instantly. A 35c trial bottle, at drug stores, proves it—or money back. 28

"Who isn't? I mean, well, we all have our little secrets."
"I must know why he lied to me."
"Too late to catch him now, my dear."

"Father?"
"What?"
"Have you any money on you?"
"I've a half crown in a pocket somewhere."

"Is that all?"
"Yes. But Crump has sixteen pounds. He won it on a horse race. I saw it."

"Get it."
"What for?"
"Never mind. Get it."

"Anything to oblige a lady," said the earl. "Where are you going?"

"To change my clothes."

"For riding?"

"No. I'm going to London."

"Right you are. We can just catch a train from Bristol if we step on the gas."

"We?"

"You and I."

"But why you?"

"Young lady," said the earl, "you're not the only Bingley that has a heart. Get a wiggle on."

As their train wormed its way into the heart of the metropolis, the Earl of Bingley and his daughter were finishing their session as a ways and means committee of two.

"Oh, you'll find him, never fear," the earl assured Rosa.

"But where? He left no address."

"Oh, rich Americans are always easy to find in London," said the earl.

"In the morning one looks in the Bond street shops, or in the Burlington Arcade, where they gather in droves to buy regimental stripe ties. At noon they are to be found in the Cheshire Cheese or Simpson's-in-the-Strand, lurking behind steak-and-kidney pies. Afternoons they are in the better West End bars. By evening they have flocked to the costlier night-clubs, and when these close they go to ground in the swankier hotels."

"I'll try the big hotels first," said Rosa.

"And I," said the earl, "shall follow his spoor from bar to bar along Piccadilly."

"I don't think you'll find Ernest in a bar. A book store is more likely."

"One never knows where one may find a will-o'-the-wisp like Ernest."

"He is unexpected," admitted Rosa.

"Though why he concocted that elaborate fairy-story about a fiancée, I can't imagine."

"Rowena Castle!" chuckled the earl. "And that touch about her father owning all the pubs in Chicago!"

"Do you think he really has delusions, father?"

"Not that cucumber," replied the earl, emphatically. "We had many a pow-wow in the potting shed on everything from world peace to sweet peas, and I must say I found old Ernest sound and rational."

"But why invent a girl?"

"Oh, he must have a reason, and a jolly good one, too. Romeo does not beetle off leaving Juliet in tears for a laugh."

"Where do you get that Romeo and Juliet stuff?" demanded Lady Rosa.

"The language of the younger generation," said the earl, primly, "is as shocking as their attitude toward us old gaffers of sixty. You talk as if we had neither eyes nor memories."

"What have you noticed?"

"That E. Bingley is smitten with R. Bingley; but R. Bingley considers E. Bingley a weevil, a quince, a twirp and a poor thing."

"That's not so," flashed Rosa. "I love Ernest and you know it."

"Of course I know it, dear," said the earl. "I've known it since I saw you playing house in the tree-tops."

"Do you mind?"

"I do," said the earl.

"Why? Because you think the gossips will say I married him—I mean I would have—for his money?"

"That's a lot of turtle-soup," said the earl. "It's just as easy to love sincerely a rich man, as a poor one. Easier. But we Bingleys don't marry for money. Wish one of us had—"

"Why do you object to Ernest?"

"You need not glare at your venerable dad like that, Rosa. I don't object to Ernest as Ernest. I just happen to think that no man that ever had knees and elbows is worthy of my darling daughter."

Rosa smiled.

"Would you give us your blessing?"

"Ernest is oaksy-doaksy by me," said the earl.

Each pad will kill flies all day and every day for three weeks.
3 pads in each packet.
10 CENTS PER PACKET
at Druggists, Grocers, General Stores.
WHY PAY MORE?
THE WILSON FLY PAD CO., Hamilton, Ont.

"You're a dear old dear," cried Rosa and kissed him.

"Thank you," said the earl, "but I must point out that before one can make 'hassenpfeffer' one must bag the bunny."

"I'm not trying to bag Ernest, and he's not a bunny," retorted Rosa, haughtily. "I just want to tell him what I think of him for telling me such an outrageous lie."

"Oh, I see," said the earl. "Well, here we are. Paddington. And what a beastly day it is. Suppose you start out to cover the swaggers hotels. I'll give the bars a try. Then you phone me at my club at seven. I'll be there, dressing for dinner."

"Are you taking me to dinner, father?"

"Sorry. I'm booked to dine and do a show with Puggy Ivarson. Old Rugbians together, and so on."

"When do you meet him?"

"Seven-thirty sharp. At his club. Arranged it yesterday."

"He may be late."

"Not Puggy. Always on the dot."

"He may be just a little late," said Rosa. "I read in The Times this morning that he is in India."

"Well, well," said the earl. "He must have flown out last night. How these cabinet ministers do get about!"

"Pity to waste your theatre seats," said Rosa. "What are you going to see?"

"Pantomime at the Haymarket."

"I love pantomimes," Rosa said. "Maybe if I had a mink coat you'd take me."

He caught up his umbrella.

"I'll take you across my knee, you imp," he cried.

They both laughed.

A minute later they debouched from the train.

"Good hunting, dear child," said the earl as they parted in Piccadilly Circus.

But it was not good hunting.

When she phoned to her father at his club at seven she said, wearily,

"He's not at any of the better hotels."

"He's not in any of the better bars," reported the earl.

"I put advertisements in the personal columns of all the newspapers," said Rosa.

"So did I," said the earl.

"What are we to do?"

"Keep looking," said the earl. "And don't worry. If he's in London we'll find him."

"He must be here," said Rosa. "No ship sails to New York for three days."

"Check with me tomorrow morning at nine," the earl said. "Now I must chop off our chat. I've got to crawl under the bed and look for my shirt-studs."

"So Puggy Ivarson did get back from India, after all," said Rosa.

"Suppose you go back home to the zoo," said her father and hung up.

Lady Rosa almost did go to the zoo. She had tried nearly every other place where an American millionaire might be. She decided to dine at Nero's, instead.

To dine at Nero's was an extravagance, Rosa knew, if your purse made you study the right hand side of the menu; but there would be soft music there to rest her, and good food to give her strength; and she knew that the fact that Nero's was the most expensive restaurant in the world gave it an irresistible lure for visiting Americans of means.

Police Patrol For Bridge Opening

Links Canada With United States Over St. Lawrence River

A colorful police patrol has been ordered at the boundary between the United States and Canada for the official opening of the New Thousand Islands International Bridge between Clayton, N.Y., and Ivy Lea, Ontario, near Brockville, on August 18th. Canadian Mounties will co-operate with New York state troopers in regulating the tens of thousands of automobiles and the more than a hundred thousand persons expected to attend the dedication of this new connecting link between the two countries.

Royal Mounted Policemen, in red coats and sombreros, and New York State Police in their grey will join in policing both sides of the St. Lawrence River at Clayton for the three-day celebration. A special corps of marine police is planned to regulate river traffic during the three days, particularly on August 20 when a marine parade will provide spectators with the greatest assemblage of pleasure craft ever exhibited on the St. Lawrence.

Arrangements are being made between headquarters of New York State Police and the Royal Mounties for privileges to cross the border in handling the anticipated crowds. The actual dedication of the bridge, at which President Roosevelt has tentatively accepted an invitation to attend, will be held on Wellesley Island, one of the largest in the Thousand Islands group.

The new bridge, which in five separate spans and 8½ miles of approaches and roadways links Canada with the United States over the St. Lawrence river and the Thousand Islands, crosses almost the exact spot in the river where the latest hostilities between the two nations occurred a century ago during the Patriot War.

The incident was the plundering and burning of the Canadian-owned steamer Sir Robert Peel by a band of 22 men disguised as Indians. The leader of the raid was William Johnson, a former Canadian soldier who married an American. As a result of Johnson's act, both governments placed steamers in the St. Lawrence for protection of the border.

But the patrol boats remained in the river only a few months. Late in 1838, further agitation was discouraged in public meetings and newspapers and sentiment began to develop to promote peace and harmony of the frontier. Dedication of the bridge on August 18th will mark one hundred years of accord between the two nations.

Skin Test

Scientists Say It Changes In Elasticity During Disease

Ability of the human skin to stretch is a newly discovered prognosticator of death or recovery in several serious diseases.

The methods of using skin stretch, worked out at Tulane University School of Medicine, were reported to the American Medical Association by Dr. William A. Soderman and Dr. George Burch.

The skin, which doctors call "the outer defence of the body," changes its elasticity during disease. The change is connected with alterations in the pressure in body tissues. The Tulane physicians have worked out methods of measuring both skin stretch and tissue pressure and of using them to foretell the course of illness before the patient himself feels a change.

In disease the skin tightens the tissue, pressure rises. In health the abdomen skin has the greatest elasticity, six times as much as that of the shin bone, and twice as much as the skin on the back of the hand. Why, the physicians said, is not known.

The pressure in the tissues of the back of the hand is equal to a column of water half an inch deep. From this low it ranges up to 1½ inches of water for leg tissues. But in some diseases these tissue pressures are multiplied up to 10 or 15-fold.

The question is raised whether a snail has any teeth. Well, he always seems to move as if on the way to the dentist, doesn't he?

Speaking of the problem of places to go for the summer vacation, there is always the last resort: home.

Co-operative Organization

Lays Blame For Present Conditions On The Average Citizen

Outlining the evils of the profit-motivated economic system, Morris Erickson, secretary of the North Dakota division of the Farmers' Educational and Co-operative Union of America, laid the blame of present conditions at the door of the average citizen.

He addressed a public meeting in Saskatoon held in the interest of the co-operative movement and declared: "We have no right to ask the government to do for us what we as individuals refuse to do for ourselves."

"We are doing penance for being indifferent to the liberty that comes with democracy," he maintained and insisted that conditions could be corrected if mass intelligence was put to work. In North Dakota almost every solution had been tried and the farmers had finally decided that the solution to their problems was to be found in self-help through economic co-operative action.

Of approximately 6,500,000 farmers in the United States, 5,000,000 of them were either bankrupt or so close to it that they were no longer freeholders. Farmers controlled less than 21 per cent. of the equity in the land of North Dakota, security and borrowing power were exhausted and 200 great corporations in the United States controlled the economic life of every American citizen.

Co-operative organization, Mr. Erickson argued, offered the check to such procedure. It was directly contrary to the profit system and gave service at cost through collective ownership. He quoted instances to show that co-operatives had been proven successful.

Will Need Wheat

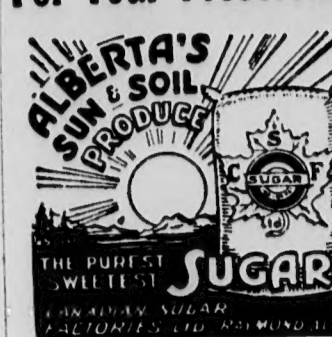

Canada Has Hopes Of Selling To Mediterranean Countries This Year

Canada certainly has high hopes of selling greater quantities of wheat this year to Mediterranean countries, A. B. Muddiman, Canadian trade commissioner to Italy, Spain, Portugal and Malta, said.

A drought is raising havoc with a large part of northern Italy's crop. He hoped Italy would turn to Canadian wheat. Portugal is in sound financial position after five years of balanced budgets and should be a good customer.

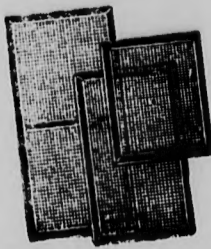

During 1932, 5,580 motor cars were stolen in the metropolitan area of London.

LOCAL & GENERAL

Mr. and Mrs. John Hislop are spending their vacation at Sylvan Lake

Mrs. Max Hearst of Drumheller is visiting this week with her parents Mr. and Mrs. Harry Pearson

Word has been received that Mr. Jack Clarke of Burnside has been appointed principal of Langdon high school east of Calgary

Mrs. Cecil Studer left on Sunday evening for her home in Edmonton after staying a few days with Mr. A. G. Studer

Jean and Donald Fleury of Dawson Creek are spending their holidays with their grandparents, Mr. and Mrs. M. Weber

Mr. and Mrs. J. F. Smith and family of Edam, Saskatchewan, are visiting Mrs. Smith's brothers in the district, J. and R. G. Ady

Mr. Eldon Brown, Misses Ada Simon and Helen Turner of Salem, Oregon, are visiting relatives and friends here

At Ivan Weber's oil station Turner Valley Naphtha has been reduced to 11c, plus tax. See him for requirements

Ed Buhr who operates an elevator in the south country, returned Sunday after spending his vacation with his parents here

The regular meeting of the Knox Junior Ladies' Aid will be held at the home of Mrs. Verne Gillrie on Tuesday, July 26th, at 8 p.m. All visitors are welcome.

Girls! Here's a new love thrill for you... Tarzan is here with his lovely mate! Johnny Weissmuller and Maureen O'Sullivan in "Tarzan Escapes," at the movies this weekend

Mr. and Mrs. W. D. Spence and Barbara drove to Sylvan Lake on Sunday. Mrs. Spence and Barbara remained there for a few weeks' vacation at the Studer cottage

A. Melville Anderson, Optometrist and Optician, 224 8th-Ave.-W., Calgary, established since 1910, will be in Didsbury at the Rosebud Hotel on Monday afternoon, July 25th (2)

The Catholic Women's League will give a Chicken Supper in the Leuzler Block on Saturday, July 30. Supper 30c a plate. Drawing 8 p.m. sharp (291p)

Mrs. F. Mainfroid, of the Rosebud Hotel, left Monday for Nelson, B.C., where she will supervise the rebuilding of the Strathcona Hotel, which was destroyed by fire June 19

Mr. W. S. Brickman and daughters Phyllis and Rosella of Dauphin, Manitoba, are visiting here with Mr. and Mrs. Jack and Mr. and Mrs. Russell Ady

K. Roy McLean, Optometrist and Optician, 210 Southam Building, Calgary, will make his next visit to Didsbury at the Rosebud Hotel on Monday morning, August 1st (2)

At the Canadian Legion meeting July 30th, Rev. A. S. Caughell will give an illustrated lecture on "Palestine" at 9 p.m. in the Legion Hall. Scouts, Cubs, and all interested are invited

Mr. and Mrs. A. A. Thomas returned Monday night from their vacation in the south country. They visited with Mrs. Thomas's parents at Milk River and motored in the Crow's Nest Pass

Jim Kirby recently installed a modern "Frigidaire" unit for the refrigerator at his meat shop. With this equipment Jimmie's customers can be assured of their meat being in the best condition regardless of the hot weather

The Olds Fair will be held this Friday and Saturday when there will be good exhibits and a good program each day. There will be a merchant display of 25 booths in the Arena. On Saturday a reunion banquet for Old Timers of 35 years' standing and 60 years of age will be a feature in the Arena Hall.

Bert Fisher and W. D. Spence ran into the hail storm between Innisfail and Bowden on Sunday evening while coming home from Sylvan Lake. Mr. Spence managed to get under a tree and saved his car from damage but the Fisher car had twenty holes driven through the top

LOCAL & GENERAL

Mr. and Mrs. J. V. Berscht and Joan returned from their trip to the coast on Saturday

Mr. and Mrs. W. Morrow of Calgary are visiting the latter's parents Mr. and Mrs. H. M. Reiber.

Gerald Boettger attended a Cock-shutt dealers' binder conference at Red Deer on Monday.

Pete Miquelon left on Tuesday for Penhold, at which point he will relieve the C.P.R. agent

Mr. and Mrs. Howard Halliday left on Monday for their vacation. They will motor to Waterton Lakes and other points

Mrs. Colin Cleugh, Joyce and Patsie, of Drumheller, are visitors with Mr. and Mrs. Allen Hunsperger and family

Camp Meeting

The annual camp meeting of the M.B.C. Conference will convene Friday night, July 22 at 8 p.m.

Dr. H. E. Jessop, a member of the faculty of the Chicago Evangelistic Institute, Chicago, Illinois, will be the Evangelist.

Many of the ministers of the conference are expected to be with us. A number of them will be preaching during the camp.

There will be three services each day of the camp. The morning service at 10:30 a.m., afternoon 2:00 p.m. and night at 8:00 p.m. The Sunday night service will start at 7:30 p.m. Each day at 1:30 will be held a young people's service, also a children's meeting. Wednesday, July 27th will be Bible School and Young Peoples Rally Day. Friday July 29 will be Missionary Day.

As in the past the meals at the camp will be served free. The expenses of the camp are to be met with donations and free-will offerings.

You are cordially invited to attend these services.

Melvin Sports Next Wednesday

The Melvin Sports will be held next Wednesday, July 27th. There will be a baseball tournament with 4 teams entered; girls' softball; junior boys' softball; horse races and athletic events. At night there will be a big dance, with the Calgary Hillbillies supplying the music.

Obituary.

WILLIAM GEORGE WATERS

Pioneer farmer of the Rocky Mountain House district since 1913, William George Waters, 71 years, died in a Calgary hospital June 12th, after a lengthy illness. He was born in Langley, England, and had been under medical treatment in Calgary for the past five months.

He leaves his wife, Mrs. Maria Waters, Rocky Mountain House; one daughter, Mrs. J. Weekes of Duncan, B.C.; two sons, Archibald of Toronto, and Alfred W. of Calgary, and twelve grandchildren.

Mr. Waters for some time operated the North End Livery Barn at Didsbury and was well known in this district.
